PROFESSIONAL SUMMARY

Result-oriented Software Engineer with 2 years of experience and a passion for web application development. Solid understanding of responsive web design, cross-browser compatibility, and asynchronous programming. Looking to apply for a Front-end software engineer position to further advance web development foundation and contribute to future organization by developing high quality web applications.

EXPERIENCE

August 2023 - December 2023

Front-end Software Engineer Intern

The Guide Network, Puyallup, WA

- Collaborated with the rest of The Guide Network team to understand and complete web application requirements using JavaScript, React, ChakraUI, Git, VSCode
- Built dynamic webpages with React components following best practices guidelines.
- Constructed API calls from frontend code to communicate with backend services.

August 2020 - January 2022

Associate Software Engineer

Schweitzer Engineering Lab, Pullman, WA

- Participated in the process of software development life cycle (analysis, implementation, testing, deployment, and maintenance)
- Followed Agile software development methodologies and utilized Computer Science fundamentals to solve problems and deliver high quality software solutions
- Collaborated effectively with other engineers and co-workers within the Research and Development department

EDUCATION

March 2020

Bachelor of Science (B.S.) in Computer Engineering

University of Washington, Seattle, WA

September 2016

Associate in Science (A.S.) in Engineering

Seattle Central College, Seattle, WA

CERTIFICATIONS

- Meta Front-end Developer Professional Certificate
